

Levy Andrew Deployment 07

I push the blueocean image from my local computer to my dockerhub as la22/myjenkins:latest

I push this to the EC2 docker with these following commands

```
docker pull la22/myjenkins:latest
```

Retag to Jenkins:latest

```
docker tag la22/myjekins:lastest Jenkins:lastest
```

Remove my pulled image

```
docker rmi la22/myjenkins:latest
```

Tag to AWS ECR and pushing to ECR

```
docker tag jenkins:latest 278144774015.dkr.ecr.us-east-2.amazonaws.com/jenkins:latest
```

```
docker push 278144774015.dkr.ecr.us-east-2.amazonaws.com/jenkins:latest
```
